WORK EXPERIENCE

Google Summer Of Code - OWASP [Github](#) Summer '14
Developed a PHP/MySQL web application which provides an interactive teaching environment for learning web application security. It offers lessons in form of CTF style challenges. In each challenge the user must exploit the critical vulnerabilities in virtual environment to demonstrate their understanding.

Mellon Labs - Web Developer Intern Summer '13
Developed a location sharing platform ([Zeocode](#)) in PHP/MySQL + CodeIgniter MVC. It is used to encode geographical location and postal address to make it easy to share. Also developed it's RESTful API service.

Mellon Labs - Student Employee Aug '13 - Present
Working on the project 'Zeocode' as a part time student employee. Maintaining the current version and integrating new features in it.

OTHER PROJECTS

Information Visualization [Github](#) May '13 - Dec '13
Defense Research and Development Organization (DRDO), Delhi

- Studied various techniques of data visualization and cognition.
- Developed a Virtual Reality 3-D model in Python (using "vizard" Library).
- Designed web based Visualization Models in JavaScript using d3 library.
- Integrated web based model into the virtual world.

CASS - Two pass assembler [Github](#) Nov '13 - Dec '13
The LNM Institute of Information Technology

- Designed our own 8085 like Instruction Set Architecture.
- Developed a two pass assembler in C++ for the same.
- Mitigates some of the limitations of the 8085 ISA like - less number of registers, more number of cycles, heavy dependency on accumulator etc.

OPEN SOURCE PROJECTS

phpMyAdmin [Github](#) June '14 - Present
phpMyAdmin is an open source software written in PHP, intended to handle the administration of MySQL over the Web. Contributing to the project by fixing various bugs.

OWASP PHP Security Project [Github](#) Sept '13 - Present
